ASAD ALI

Phone: +92 307 7546633 | Email: asadrealone@gmail.com | LinkedIn: linkedin.com/in/asadrealone | GitHub: github.com/asadrealone

PROFESSIONAL SUMMARY

Motivated AI/ML enthusiast pursuing a Bachelor's degree in Computer Science with hands-on experience in developing machine learning models for predictive analytics. Proficient in Python, Scikit-learn, TensorFlow, and PyTorch with strong foundations in Machine Learning, Deep Learning, Natural Language Processing, and Computer Vision. Passionate about building data-driven solutions and continuously expanding expertise in Artificial Intelligence.

EDUCATION

Islamia University of Bahawalpur **2024 – 2028**

Bachelor of Science in Computer Science · CGPA: 3.75/4.00

TECHNICAL SKILLS

Programming Languages:	Python, SQL
Machine Learning:	Scikit-learn, TensorFlow, PyTorch
Tools & Technologies:	Jupyter Notebook, Git, Docker, Front-End UI (HTML/CSS/Bootstrap/React)
Core Concepts:	Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Automata Theory
Data Analytics:	Pandas, NumPy, Matplotlib, Seaborn

PROFESSIONAL EXPERIENCE

Built & Soft **4 Months**

Beginner AI/ML Intern

- Assisted in developing and evaluating machine learning models using Python and Scikit-learn environments.
- Performed detailed data preprocessing, automated data cleaning, and exploratory data analysis (EDA) on structured business datasets.
- Collaborated with cross-functional team members on active AI/ML tracks to deliver functional components inside end-to-end machine learning workflows.
- Utilized Jupyter Notebooks and Git version control for transparent experimentation, clear updates, and project documentation.

KEY PROJECTS

Loan Approval Prediction System **Python, Scikit-Learn**

- Developed a predictive machine learning model to automate credit risk assessments and determine loan approval statuses utilizing key applicant features such as profile data, income tiers, credit history scores, and financial metrics.

- Conducted full-scale engineering pipelines including structured feature encoding, imputation strategies, scaling operations, and exploratory correlation studies.
- Achieved a verified **85% predictive accuracy** applying a fine-tuned Decision Tree Classifier framework.
- **Tech Stack:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook.

Customer Churn Prediction for Telecom Industry **Python, Scikit-Learn**

- Built an end-to-end binary classification asset designed to detect high-risk consumer attrition churn metrics within telecom services using contractual records, historical usage profiles, and billing matrices.
- Executed strategic feature engineering and selection methodologies to isolate key attrition markers, optimizing validation metrics.
- Delivered an outstanding **89% evaluation accuracy** leveraging an optimized Random Forest Ensemble platform.
- **Tech Stack:** Python, Pandas, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook.

CERTIFICATIONS & STRENGTHS

- **Data Science Basics Certification** — Issued by Built & Soft, Bahawalpur.
- Comprehensive command over foundational Supervised and Unsupervised Learning paradigms.
- Solid handling of complete product lifecycle flows: ingestion protocols, data engineering, validation, and localized scaling.
- Committed lifecycle learner expanding specialization into advanced Deep Neural Architectures, NLP systems, and AI alignment.
